

EGI Containers (beta)

This service is in a beta phase

Introduction

This first iteration of the EGI Containers service is based on the DockerHub.

An EGI Foundation organization was created in order to be able to host the containers: <https://hub.docker.com/r/egifoundation/>

In the future Containers may be integrated within the EGI AppDB.

Getting a container published in the EGI DockerHub

- Stage Rollout/QA results
- Technical documentation

Product teams

- Information about all the Product Teams (PT)

This should contain:

- PT Name
- PT Contact (Name and email)
- PT Homepage
- PT Source repository
- Products
- License
