

EGI Federation Operations

Policies and Procedures governing the EGI Federation operations.

 Content not yet migrated there is available at [Documentation in EGI Wiki](#).

Title	Approval status	Procedure status	Statement
PROC09 Resource Centre Registration and Certification	APPROVED	FINAL	A procedure describing the steps for registering and certifying new Resource Centres (sites) in the EGI infrastructure. The certification steps can also be used to re-certify suspended Resource Centres (sites).
PROC19 Integration of new cloud management framework or middleware stack in the EGI Infrastructure	APPROVED	FINAL	A procedure for integrating new cloud management framework (Cloud platform) or middleware (Compute, Storage, etc.) in the EGI Production Infrastructure.
PROC22 Support for CVMFS replication across the EGI Infrastructure	APPROVED	FINAL	The procedure describes the process of creating a repository within the EGI CVMFS infrastructure for an EGI VO
PROC20 Support for CVMFS replication across the EGI and OSG CVMFS services	APPROVED	FINAL	The document describes the process of enabling the replication of CVMFS spaces across OSG and EGI CVMFS infrastructures
PROC14 VO Registration	APPROVED	FINAL	The document describes the process of enabling a Virtual Organisation (VO) on the EGI infrastructure.
PROC21 Resource Centre suspension	APPROVED	FINAL	The document describes the process for suspending a Resource Centre in the EGI infrastructure
PROC02 Operations Centre creation	APPROVED	FINAL	The purpose of this document is to clearly describe the actions and the relative steps to be undertaken for integrating an Operations Centre into the EGI Infrastructure.
PROC03 Operations Centre decommission	APPROVED	FINAL	The purpose of this document is to clearly describe the actions and the relative steps to be undertaken for decommissioning an Operations Centre.
PROC13 VO Deregistration	APPROVED	FINAL	A procedure describing how to decommission a Virtual Organization currently registered in the EGI infrastructure.
PROC15 Resource Center renaming	APPROVED	FINAL	A procedure for changing name of a Resource Centre.
PROC11 Resource Centre Decommissioning	APPROVED	FINAL	A procedure describing the steps to decommission Resource Centres in the EGI infrastructure.
PROC12 Production Service Decommissioning	APPROVED	FINAL	A procedure describing the steps to decommission a Service operated by a Resource Centre in the EGI infrastructure
PROC16 Decommissioning of unsupported software	APPROVED	FINAL	A procedure for removal of unsupported software from production infrastructure
PROC01 EGI Infrastructure Oversight escalation	APPROVED	FINAL	The purpose of this document is to define escalation procedure for operational problems
PROC08 Management of the EGI OPS Availability and Reliability Profile	APPROVED	FINAL	This document specifies the procedure for modifying the EGI OPS Availability and Reliability profile
PROC06 Setting Nagios test status to operations	APPROVED	FINAL	The purpose of this document is to clearly describe the actions and the relative steps to be undertaken for including Nagios tests into the ARGO_MON_OPERATORS profile: in this way, the operations dashboard will display an alarm in case the test fails.

PROC07 Adding new probes to ARGO	APPROVED	FINAL	This document specifies the procedure for adding new probes to the ARGO Monitoring service
PROC04 Quality verification of monthly availability and reliability statistics	APPROVED	FINAL	Instructions RODs and Operations Centres on how to handle justification for poor monthly performance
PROC10 Recomputation of SAM results or availability reliability statistics	APPROVED	FINAL	This procedure documents the steps for requesting a correction in the SAM test results and in the related availability/reliability statistics.
